Canon CPN - Changing the focus screen EOS 40D, 50D, 5D and ...

A microprism focusing screen such as the Ec-A helps with manual focus by visually diffracting a subject when it is not in focus and eliminating the diffraction when the subject is in focus. The microprism focusing area occupies the center portion of the screen, and can be used with lenses that have a maximum effective aperture of f/5.6 or wider.

Canon Knowledge Base - QuickGuide to EOS Focusing Screens

This screen made it easier to focus my manual-focus Rokinon 85mm/1.4 when mounted on my Canon 60D DSLR. I had previously tried the Canon EFS focusing screen, which has a roughly-ground area to facilitate focusing on the screen. Although the EFS screen did improve my focusing accuracy, I bought the Fotodiox screen hoping for further improvement.

40D with Ef-S focusing screen Jan 29, 2008 ... Has anyone compared the viewing and focusing characteristics with the standard Ef-A focusing screen and the Ef-S screen that can be fitted. The Ef-S is supposed to be easier to use with manual focus, ...

40D with Ef-S focusing screen: Canon EOS 7D / 10D - 90D ...

My 40D will not focus with the center point or the top three other points. The other focus points work fine. The confirmation light in the view finder (when using the 4 bad focusing points) just keeps flashing and never confirms focus. The other focus points will stop flashing when focus has been achieved. I chose the points individually.

This Ef series Super Precision Matte Ef-S Interchangeable Focusing Screen from Canon provides easier manual focusing through your viewfinder on subjects in low light when using lenses with a wide aperture between f/1.8 to f/2.8.. This "S" type focusing screen works by decreasing the focus of the slightly out-of-focus areas around your in-focus subject for a sharper contrast.

Canon Super Precision Matte Ef-S Interchangeable Focusing ...

Until the EOS 40D was introduced, you really needed to use a full-frame digital camera, like the Canon EOS 5D, to get such a bright view and easy manual focus. However, you can now swap the 40D's focus screen—great for viewing and autofocus—and use the EF-S Super Precision Matte screen, which is optimized for manual focus.

Focus Modes - Canon EOS 40D Guide - Canon Camera Experts

This screen made it easier to focus my manual-focus Rokinon 85mm/1.4 when mounted on my Canon 60D DSLR. I had previously tried the Canon EFS focusing screen, which has a roughly-ground area to facilitate

focusing on the screen. Although the EFS screen did improve my focusing accuracy, I bought the Fotodiox screen hoping for further improvement.

The Canon EOS 40D is a 10.1-megapixel semi-professional digital single-lens reflex camera. It was initially announced on 20 August 2007 and was released at the end of that month. It is the successor of the Canon EOS 30D, and is succeeded by the EOS 50D. It can accept EF and EF-S lenses. Like its predecessor, it uses an APS-C sized image sensor, resulting in a 1.6x field of view crop factor
