Subraces []. Each of the four fundamental elements had associated genies, so the most common genasi were air genasi, earth genasi, fire genasi, and water genasi. Para-genasi were genasi who expressed a bloodline of two elements. These included the dust para-genasi, ice para-genasi, magma para-genasi, ooze para-genasi, smoke para-genasi, steam para-genasi, among other possibilities.

Water genasi usually leave their parents upon reaching maturity, taking to the open sea in order to explore, learn and develop their own personality and place in the world. Many water genasi feel strong ties to great bodies of water and see themselves as possessing the deep, elemental strength of oceans and mighty rivers.

The word “tetrapod” means “four feet” and includes all species alive today that have four feet — but this group also includes many animals that don’t have four feet. That’s because the group includes all the organisms (living and extinct) that descended from the last common ancestor of amphibians, reptiles, and mammals. So, for example, the ichthyosaur, an extinct swimming reptile ...
