6-1 Experiment 6 Coffee-cup Calorimetry  
Introduction: Chemical reactions involve the release or consumption of energy, usually in the form of heat. Heat is measured in the energy units, Joules (J), defined as  $1 \text{ kg}\cdot\text{m}^2/\text{s}^2$ . Another common heat unit is the calorie (cal). It is defined as the amount of heat required to

Anionic aluminum(I) anions (“aluminyls”) are the most recent discovery along Group 13 anions, and the understanding of the unconventional reactivity they are able to induce at a coordinated metal site is at an early stage. A striking example is the efficient insertion of carbon dioxide into the Au–Al bond of a
