Child Development Observation Paper Examples

Child development involves the biological, psychological and emotional changes that occur in human beings between birth and the conclusion of adolescence. Childhood is divided into 4 stages of life which include early childhood, middle childhood, late childhood (preadolescence) and adolescence. Early childhood typically ranges from infancy to the age of 6 years old.

Child development - Wikipedia

Bandura's child development theory suggests that observation plays a critical role in learning, but this observation does not necessarily need to take the form of watching a live model. Instead, people can also learn by listening to verbal instructions about how to perform a behavior as well as through observing either real or fictional ...

Moreover, play for Erikson, like Piaget, play promotes a child who is socially competent. Therefore, every child needs play as this greatly contributes to their physical, social, and emotional well-being. For example, even as early as infancy, play fosters physical development by promoting the development of sensory exploration and motor skills.
