China's achievement in artificial intelligence and high technology innovation has attracted the global attention. The country's innovation system and Chinese model arose during the period between the mid-1990s and the first decade of 21 century, making it one of the leading countries in those fields. This revised and expanded edition examines the Chinese innovation business model based on the basic concept of firm's governance structure.

...

Many studies of government in China either simply describe the political institutions or else focus, critically, on the weaknesses of the system, such as corruption or the absence of Western-style democracy. Authors of these studies fail to appreciate the surprising ability of China's government to rapidly transform a once impoverished economy and to recover from numerous crises from 1978 to ...

China has proposed a series of new concepts and approaches on the issue of global governance, as well as an action plan for the next five to 10 years to push forward on reforming and strengthening the existing global governance institutions. China's concepts of global governance are the community of shared human destiny; a new type of international relations; an international win-win partnership; and the principle of mutual consultation, co-building and sharing.

China's ideology of global governance shows much continuity between the pre- and post-2008–9 periods. Authoritative Chinese views all generally indicate that China's proposed changes to the existing international order—such as reforms to correct “unjust” arrangements, strengthen the influence of developing countries, expand the idea of state sovereignty into new areas of state
