De Mulierum Organis Generationi Inservientibus 1672

- Lester S. King, "De Mulierum Organis Generationi Inservientibus," 1672, JAMA. 1966; 195 (4): 324. "Graaf demonstrated ovulation anatomically, pathologically, and experimentally. He opposed the Aristotelian doctrine of the egg being formed in the uterus as a result of activation of the menstrual blood by the male semen, but held that generation takes place from the ovum pre-existent in the ovary.

De mulierum organis generationi inservientibus, 1672 ...

De mulierum organis generationi inservientibus tractatus novus Longo, Lawrence D.; de Graaf, Regner 1996-02-01 00:00:00 According to aristotelian doctrine the egg was formed in the uterus as a result of activation of menstrual blood by the male semen. In opposition to this, during the latter part of the seventeenth century the idea gained credence that the female "testes," as the ovaries of birds, were the site of egg formation.
