Explanatory Papers

Exploratory analysis is usually qualitative research, while explanatory research is quantitative research. Explanatory research involves collecting numerical data that can be analyzed statistically to prove or disapprove a phenomenon. Descriptive research is a research design guided by research questions and research hypotheses.

Exploratory, Explanatory and Descriptive Research Designs

but most commonly evidence in academic papers comes in the form of quotations, paraphrases, and real-life examples. In this handout, we will focus on quotations. All evidence should be clear and relevant both to your paragraph's argument and to your overall thesis statement.

USING EVIDENCE Center for Writing and Speaking A ESSAY

In shorter scientific papers, where the aim is to report the findings of a specific study, you might simply describe what you did in a methods section.

... Explanatory sequential: Quantitative data is collected and analyzed first, followed by qualitative data. You can use this design if you think your qualitative data will explain and ...

What's the difference between exploratory and explanatory research?

Difference between Explanatory and Exploratory Research. Explanatory research is a type of research that answers the question "why." It explains why something happens and it helps to understand what caused something to happen. Explanatory research always has a clear objective in mind, and it's all about the execution of that objective.

Explanatory Research: Types, Examples, Pros & Cons

This section provides the definition of EO-critical software. Following that is a table with a preliminary list of software categories recommended for the initial phase along with some explanatory material. At a later date, CISA will provide the authoritative list of software categories that are within the scope of the definition and to be included in the initial phase of implementation.
