Political Networks The Structural Perspective

Network analysis begins with the assumption that the most important elements of political power are the relationships of influence and domination among social actors. Influence is the exchange of information about preferences and intentions; domination is the exchange of material sanctions to reward or punish compliance with commands. By examining the confluence of these two networks, analysts can develop a structural picture of the political process.

Political Networks by David Knoke - Cambridge Core

Abstract This chapter uncovers the social mechanisms behind policymaking by analyzing water policy networks from a structural perspective. It elaborates on the patterns of ties that form during policymaking processes and impact collective decision making.

Water Policy Networks—The Structural Perspective ...

From this perspective, a network-based assessment is useful to describe power positions, the structure of oligopoly in political markets, and the institutions of interest negotiation. Interorganizational analysis

Policy network analysis - Wikipedia

Research Summary: We examine the performance impact of corporate political strategies by analyzing the relationships among firms and various government institutions. While a firm's political connections to a focal government with decision-making authority enhance performance, connections to a rival government competing with the focal government harm performance, particularly when the rivalry ...

Network analysis offers both a toolkit for identifying and measuring the structural properties of networks and a set of theories, typically drawn from contexts outside international relations, that relate structures to outcomes.

Network Analysis for International Relations ...

person, but a person can be a member of a club. Many networks in political science have this structure. The network model of the political party draws a large set of actors in as nodes. They need not only be party officials. Campaign consultants, pollsters, candidate surrogates, even grass-roots organizers can be part of the party network.

Towards a Networks Theory of Political Parties

However, one of the main differences is in relation to how they explain the causes of political developments. Whereas structural explanations conclude that factors external to political life, such as life expectancy, are seen to account for political developments, interest-based explanations adopt the perspective that political developments are shaped by individual decisions, on the basis of what is best for them at a particular point in time.

Structural and Interest Based Theories of Politics

Political opportunity theory, also known as the political process theory or political opportunity structure, is an approach of social movements that is heavily influenced by political sociology. It argues that success or failure of social movements is affected primarily by political opportunities. Social theorists Peter Eisinger, Sidney Tarrow, David Meyer and Doug McAdam are considered among the most prominent supporters of the theory.

Political opportunity - Wikipedia

This perspective is characterized by an interest in the recurrent relationship patterns that connect the actors that make up a system's social structure. This article considers that the social network approach is the relationship among actors, be they individuals or groups such as whole organizations or parts of organizations.
