The history of the discovery of the structure of DNA is a classic example of the elements of the scientific method: in 1950 it was known that genetic inheritance had a mathematical description, starting with the studies of Gregor Mendel, and that DNA contained genetic information (Oswald Avery's transforming principle). But the mechanism of storing genetic information (i.e., genes) in DNA was ...

In the words of Leonardo DiCaprio, "We only get one planet". Yet many of us live like we have three to four more. Our air, lands, and water bodies, which we have polluted, are all parts of this environment. The diverse plants and animals around us depend on these resources just like we do. Therefore, we have a
