### **The Sheep Brain A Basic**

The human brain is 15 centimetres long and a sheep's brain is only about a third of that length. Both have three divisions namely, cerebrum, cerebellum and the brainstem. The cerebellum and brain stem are located behind the cerebrum in sheep as they have a horizontal spine. While they are located below the cerebrum in humans as they have vertical spines and are upright.

10mm bamboo needles. TIP: If you're buying yarn and needles, choose cheap acrylic yarn so that mistakes won't feel like such a big deal. As a beginner, you'll make mistakes - and that's totally normal! Mistakes are part of the journey, and they'll hurt less if you're using inexpensive yarn as opposed to pricey artisan yarn.
