Web Protocols and Practice has, however, won a spot on my bookshelf as the authoritative technical reference on the Web. Eugene writes, programs, and consults on a freelance basis. He is currently writing a book on the history of free software, entitled Software, Money, and Liberty: How Source Code Became Free .

### Web Techniques: Web Protocols and Practice

HTTP (Hyper Text Transfer Protocol) is one of the application protocols of TCP/IP, the suite of protocols that powers the Internet.Let me fix that: it's not one of the protocols, it's the most successful and popular one, by all means.. HTTP is what makes the World Wide Web work, giving browsers a language to communicate to remote servers that host web pages.

### The HTTP protocol

HTTP stands for Hypertext Transfer Protocol. Simply put - these are rules for sending and receiving text-based messages. As we all know, computers work in a language of 1's and 0's i.e. binary.

### A Basic Understanding of Web Protocols: HTTP and HTTPS ...

XHR is a JavaScript object that is used to transfer data between a web browser and a web server. XHR is often used to request and recieve data for the purpose of modifying a web page. Despite the XML and Http in the name, XHR is used with other protocols than HTTP, and the data can be of many different types like HTML , CSS , XML , JSON , and plain text.
